

Brass Ball Valve with Red Lever

This ball valve is constructed from brass and features threaded connections for installation. Its full-bore design minimizes pressure drop, making it suitable for use with water, oil, and gas.

Product Overview

Professional Brass Ball Valve

This durable brass ball valve with a red lever handle is designed for efficient flow control of liquids and gases. Featuring a full-bore design, it effectively minimizes pressure drop in various industrial and residential applications. Its robust construction makes it a reliable choice for HVAC systems, water distribution networks, and general industrial processes.

Technical Specifications
