

Brass Ball Valve with Threaded Connections

This ball valve is constructed from durable brass. It features threaded connections on both ends for plumbing integration and fluid control.

Product Overview

Professional Fluid Control Solution

This brass ball valve is engineered for reliable fluid control in a wide range of plumbing and industrial applications. Featuring a robust brass construction and secure threaded connections, it offers durability and ease of integration into existing systems. The inclusion of a high-visibility green lever handle allows for quick and intuitive operation, ensuring efficient flow management.
