Product Overview

Reliable Brass Ferrule Threaded Valve

This brass ferrule threaded valve is engineered for dependable flow control across diverse industrial applications. Constructed from high-quality brass, it provides excellent corrosion resistance and durability for long-term performance. Designed with a secure sealing mechanism and robust threaded connections, it ensures leak-proof operation even under demanding conditions.

Technical Specifications

Available Sizes

- DN15
- DN20
- DN25

Material	Brass
Sealing Standard	BS2494 Rubber
Max Pressure	21 Bar

Connection Details

Connection Types

Port	Thread Type
Inlet	G Thread
Outlet	R Thread

Product Identification

Product Code	SV-FE0101B
