Product Overview

Reliable HVAC&R Fluid Management

This brass drain cock is specifically designed for HVAC&R systems, providing a dependable solution for draining fluids from various system components. Constructed from durable brass for superior corrosion resistance, it features a threaded inlet for secure installation and a barbed outlet for easy hose attachment. With 20 years of manufacturing expertise behind its design, this valve ensures long-lasting performance in refrigeration, air conditioning, and heating applications.

Technical Specifications

Specification Size

0.5 inch

Connection Size

Product Code

Y00562

Material Features

Durable Brass, Corrosion Resistant, Long-lasting Performance

Design & Application

Connection Design

- Threaded inlet for secure system connection
- Barbed outlet for hose attachment

Suitable Applications

Refrigeration • Air Conditioning • Heating Systems

Manufacturing Excellence

Production Advantages

- 20 years of industry expertise
- Large-scale and cutting-edge manufacturing
- Green manufacturing processes
- Guaranteed quality and cost efficiency
