

Brass Quarter-Turn Shut-Off Ball Valve

This ball valve is a shut-off valve controlling the flow of liquid or gas through a pipe. It features a simple on/off operation via a quarter-turn handle.

Overview

High-Performance Brass Ball Valve

This brass quarter-turn shut-off ball valve is engineered for precise flow control of liquids and gases in industrial piping systems. Featuring a durable brass body construction, it ensures long-term reliability and resistance to corrosion. The intuitive quarter-turn handle allows for rapid, secure on/off operation, making it an essential component for critical shut-off applications.

Technical Specifications

Valve Type	Quarter-Turn Shut-Off Ball Valve
Body Material	Brass
Operation	Quarter-Turn Handle

Compliance

Certifications
UL

Applications

Suitable Media

- Liquids
- Gases
