

Brass Tubing

This is a brass pipe. It is suitable for various applications.

Product Overview

Brass Tubing Overview

This brass tubing consists of high-quality copper-zinc alloy components, valued for its excellent corrosion resistance and malleability. The material is supplied in a mixed state, featuring a variety of straight and bent sections suitable for recycling or industrial processing. Please note that this is a scrap-grade product, showing signs of oxidation and discoloration consistent with outdoor storage.
