

Brazed Diamond Cutting Blade

This cutting blade is designed with brazed diamond grit for effective cutting of hard materials. It is suitable for both wet and dry cutting applications, providing fast cutting speed and long blade life.

Product Overview

High-Performance Brazed Diamond Cutting Blade

This brazed diamond cutting blade is engineered specifically for precision cutting of hard and abrasive materials. Featuring a continuous rim with high-quality brazed diamond grit, it delivers smooth, chip-free results essential for professional masonry and stonework. Designed for versatility, the blade supports both wet and dry cutting applications, offering an optimal balance of fast cutting speed and extended blade life.
