

Broadcast Online Graphic Packaging System

This online graphic packaging system is a video and broadcast television graphics software platform. It features a user-friendly interface.

Overview

Professional Broadcast Graphics Solution

This advanced online graphic packaging system offers a robust platform for broadcast television graphics. Engineered for high stability and reliability, it enables the creation of innovative visual effects to elevate television programming. The architecture is designed to support seamless transitions from Standard Definition (SD) to High Definition (HD), fully addressing technical requirements during format migration periods.
