

Bus 360-Degree Surround View System

The Bus 360-Degree Surround View System provides a comprehensive 360-degree view around a bus, enhancing safety. Integrating multiple cameras, the system creates a seamless, bird's-eye view to assist drivers in maneuvering in tight spaces and avoiding obstacles.

Product Overview

Comprehensive Safety Solution

The Bus 360-Degree Surround View System is designed to significantly enhance driver situational awareness and vehicle safety. By integrating multiple cameras, the system provides a seamless, bird's-eye view of the vehicle's surroundings, making maneuvering in tight spaces easier and safer. This OE-designed solution is built for durability and reliability in demanding transport environments.

Technical Specifications

Video Input Channels	4 CH
Video Output	CVBS
Imaging Technology	3D DS, AVM, Seamless Splicing

Hardware & Installation

Design Standard	OE Design
Waterproof Rating	IP67
Camera Adjustability	Yes

Features

Recording Options	Optional DVR function available
