

Butterfly Valve

This is a butterfly valve used to regulate the flow of fluids. It features a rotating disc for precise control.

Overview

High-Performance Butterfly Valve

This butterfly valve is engineered for reliable flow control in industrial piping systems. Designed with durability and ease of operation in mind, it provides a robust solution for regulating fluid flow. Its compact design ensures space-saving installation while maintaining high performance standards for demanding B2B applications.

Technical Specifications

Valve Type	Butterfly Valve
Category	Industrial Flow Control, Piping Systems
