

Butterfly Valve for Fluid Control

This butterfly valve is designed to regulate the flow of fluids in pipelines. It features a rotating disc for precise control and efficient operation.

Product Overview

High-Performance Butterfly Valve

This butterfly valve is engineered for precise fluid control in industrial applications. Designed for durability and efficiency, it provides reliable flow regulation for various piping systems. Its robust construction ensures long-term performance and minimal maintenance requirements in demanding environments.

Technical Specifications

Model Identifier	PL-800
Valve Type	Butterfly Valve
Primary Application	Fluid Control
