

Cabinet Air Conditioner Motor

This motor is designed for use in cabinet air conditioners. It connects to a fan or blower.

Product Overview

High-Performance Cabinet Air Conditioner Motor

This motor is specifically engineered for integration into cabinet air conditioning systems, providing reliable performance in demanding environments. Its compact, cylindrical housing design ensures efficient space utilization, while the integrated mounting flange allows for secure and stable installation. Designed for durability, this component is an essential element for maintaining optimal airflow and temperature control within industrial cabinets.

Technical Specifications

Application	Cabinet Air Conditioner
Design Features	Compact Design, Cylindrical Housing, Mounting Flange
Function	Fan/Blower Drive
