

Cabinet Ventilation Fan with Filter

This cabinet ventilation fan is designed for cooling and filtering dust in electrical enclosures and industrial cabinets. It features a louvered grille for optimal airflow and protection against foreign objects.

Product Overview

Efficient Thermal Management

This cabinet ventilation fan is engineered for effective cooling and dust filtration within electrical enclosures and industrial cabinets. Featuring a louvered grille design, it ensures optimal airflow while protecting internal components from foreign objects. The integrated filtration system effectively prevents dust and particulate matter from entering, ensuring the reliable operation of sensitive electronic equipment in demanding environments.

Key Features

Design Advantages

- Louvered grille for optimal airflow
- Integrated dust filtration
- Protection against foreign objects
- Reliable cooling for sensitive electronics

Ideal Applications

Control Panels, Telecommunications Equipment, Industrial Cabinets, Electrical Enclosures

Specifications

Availability

Multiple Sizes Available • Customizable Cooling Solutions
