Product Overview

Compact Residential Water Softeners

These cabinet-style water softeners provide an efficient solution for municipal and well water treatment in residential settings. By utilizing advanced ion exchange technology, these units effectively reduce water hardness to levels below 0.6mmol/L, protecting your plumbing and appliances from scale buildup. The space-saving integrated design combines the resin and brine tanks into a single unit, ensuring simple installation and reliable performance for families.

Recommended Household Size

1-3 people (RL-R60C), 2-3 people (RL-R110C)

Technical Specifications

Model Comparison

Feature	RL-R60C	RL-R110C
Flow range	0.5~0.8 m ³ /h	1.0~1.5 m ³ /h
Softened water capacity	2.0 m ³	5.0 m ³
Ion exchange resin	8 L	18 L
Dimensions (mm)	440x260x625	440x260x1090

Connection Sizes

- Inlet/Outlet Diameter: 3/4 inch
- Drain Diameter: 1/2 inch
