

Cable Bundle Assembly with Coaxial and USB Cables

Cable bundle includes coaxial cables for signal transmission and a USB cable for power. This assembly is designed for use in electronic devices and communication systems.

A: Coaxial Cable; B: Coaxial Cable; C: USB Cable

Product Overview

Cable Bundle Assembly Overview

This cable bundle assembly is engineered for efficient signal transmission and reliable power delivery in complex electronic systems. By consolidating coaxial and USB connections into a single organized bundle, it simplifies cable management and installation in communication systems and electronic devices. The assembly ensures high-quality connectivity while maintaining a compact footprint suitable for various industrial and consumer applications.

Technical Specifications

Included Cable Types

- Coaxial Cable (A)
- Coaxial Cable (B)
- USB Cable (C)

Configuration Details

Cable Identifier	Type
A	Coaxial
B	Coaxial
C	USB

Primary Applications

Signal Transmission, Power Delivery, Communication Systems, Electronic Devices
