

Caliper Brake for Bicycles

This high-performance caliper brake is designed for bicycles. It features durable construction for reliable stopping power and is compatible with a wide range of bicycle models.

Product Overview

High-Performance Caliper Brake

This high-performance caliper brake is engineered for reliable stopping power and consistent performance across various riding conditions. Constructed with durable steel-reinforced resin, it ensures longevity and structural integrity. The design includes dual spring tension adjustment for easy maintenance and setup, making it a versatile choice for both road and hybrid bicycles.

Technical Specifications

Material	Steel-reinforced resin
Adjustment Mechanism	Dual spring tension adjustment

Compatibility

Suitable Bike Types	Road Bike, Hybrid Bike
