

Cam and Groove Flange Adapter

This stainless steel adapter utilizes a cam-locking mechanism for secure connections. It is suitable for fluid transfer applications involving water, oil, and chemicals.

Product Overview

Industrial Cam and Groove Flange Adapter

This stainless steel cam and groove flange adapter is engineered for robust fluid transfer applications, providing a reliable connection between hoses or pipes and flanged systems. It features an integrated cam-locking mechanism that ensures secure, rapid connections in demanding industrial environments. Built with high-durability materials, this adapter offers excellent corrosion resistance and is compatible with a wide range of media, including water, oil, and chemicals.

Technical Specifications

Connection Mechanism

Cam-locking • Flanged

Application Suitability

- Industrial fluid transfer
- Hose to flange connection
- Pipe to flange connection

Material

Stainless Steel

Compatible Media

Water, Oil, Chemicals
