

Cam Bushing Sleeve

This cam bushing sleeve provides a bearing surface for camshafts within an engine. The cylindrical component features a bronze-colored inner lining and a silver-colored outer surface.

Product Overview

High-Performance Cam Bushing Sleeve

This precision-engineered cam bushing sleeve is designed for demanding mechanical applications, providing reliable support and wear resistance. Built with a durable cylindrical structure, it features a specialized bronze-colored inner lining for optimized friction management. The component is marked with specific identification codes, ensuring traceability and compatibility for professional maintenance and assembly requirements.

Technical Specifications

Construction Features

- Cylindrical geometry
- Bronze-colored inner lining
- Silver-colored outer surface
- Integrated notch for alignment
- Precision circular hole

Identification Markings

390 1085 13, 7 4, RSXD BRAZIL
