

Car Audio Subwoofer Components

These are components for high-performance car audio subwoofers. The parts include the speaker cone and the motor assembly for building or repairing a custom subwoofer system.

Product Overview

High-Performance Subwoofer Components

These high-performance car audio subwoofer components are engineered for audiophiles and custom system builders. The set includes a robust speaker cone with a durable surround for enhanced excursion, alongside a precision-engineered motor assembly. Designed for efficient power handling and accurate sound reproduction, these parts provide the essential foundation for deep, clear bass response in any automotive audio setup.

Technical Specifications

Included Components

- Speaker Cone
- Surround
- Magnet
- Voice Coil
- Basket

Key Features

High Excursion • Durable Surround • Efficient Power Handling • Precision Sound Reproduction

Application

Custom Audio Builds, Subwoofer Repair, Automotive Audio
