Product Overview

Professional Carbide Tipped Circular Saw Blade

Engineered for high-performance cross-cutting and ripping, this circular saw blade features premium tungsten carbide teeth for exceptional wear resistance and heat tolerance. The advanced ATB (Alternating Top Bevel) tooth geometry ensures clean, splinter-free cuts across a wide variety of materials including hardwoods, softwoods, and plastics. Designed for durability and precision, the fully hardened steel body resists bending, while integrated heat expansion slots maintain blade integrity during heavy-duty use.

Technical Specifications

Teeth Material	Tungsten Carbide
Body Material	50# Carbon Steel (65Mn Steel available)
Tooth Geometry	ATB (Alternating Top Bevel)
Available Diameter Range	4 inch - 12 inch
Tooth Count Range	18T - 120T

Compatibility & Usage

Compatible Equipment

- Circular Saw
- Miter Saw
- Table Saw
- Radial Arm Saw

Compatible Materials

Softwood, Hardwood, Plywood, Chipboard, MDF, Laminated Panels, FRP, Plastic
