

Carbide-Tipped Woodworking Saw Blade

This circular saw blade features durable carbide tips for efficient woodworking. It incorporates expansion slots to reduce heat and prevent warping, ensuring smooth cuts on hardwoods, softwoods, and composites.

Product Overview

Professional Carbide-Tipped Saw Blade

This circular saw blade is precision-engineered for professional woodworking applications, featuring a durable carbide-tipped cutting edge that ensures extended tool life and efficient material removal. Designed with specialized expansion slots, the blade actively reduces heat buildup and prevents warping during high-speed operation. It delivers smooth, clean cuts with minimal splintering across a wide range of materials, including hardwoods, softwoods, and composites.

Technical Specifications

Cutting Edge Material

Carbide-Tipped

Blade Type

Circular Saw Blade

Compatible Materials

Hardwood, Softwood, Composite Materials

Design Features

Key Features

- Expansion slots to reduce heat buildup
- Anti-warping design
- Minimal splintering performance
- Standard arbor hole compatibility

Thermal Management

Yes
