Overview

High-Energy Carbon-Zinc Power

These high-energy carbon-zinc dry cell batteries are designed with a durable aluminum foil jacket for a premium finish. Engineered for reliability, they feature a leak-proof construction to protect your electronic devices during use. With an environmentally friendly composition that is free of mercury and cadmium, these batteries provide a dependable power solution for a wide range of applications.

Technical Specifications

Performance

50 %

Additional Power

Chemical System	Carbon-zinc (Zn-MnO ₂)
Nominal Voltage	1.5 V
Size	AA (R6P)
Shelf Life	3 years

Compliance & Standards

Environmental Compliance

0% Mercury • 0% Cadmium • Leak-proof Design

Certifications & Standards	IEC Standard, ROHS, EU Battery Directive 2006/66/EC
----------------------------	---

Quality Control

Physical Quality Standards

- No stains
- No deformation
- No leakage
- No cracks
