

Carburetor Mounting Flange

This carburetor flange connects the carburetor to the intake manifold on an internal combustion engine. It provides a secure, airtight seal that ensures efficient delivery of the air-fuel mixture to the engine cylinders.

Product Overview

Engine Integration Component

This carburetor mounting flange is a critical component designed for internal combustion engines in vehicles and various machinery. It serves as the secure interface between the carburetor and the intake manifold, ensuring an airtight seal for optimal engine performance. Engineered to withstand the rigors of engine operation, it effectively facilitates the delivery of the air-fuel mixture to the cylinders.

Technical Details

Sealing Capability

Airtight • Secure

Primary Application	Internal Combustion Engines
Core Function	Connects carburetor to intake manifold

Material & Construction

Resilience Factors

- Heat resistance
- Pressure resistance
- Vibration resistance

Construction Materials	Metal, Reinforced Plastic
