Product Overview

Professional Cast Iron Circular Burner

This high-performance circular burner is engineered for durability and consistent heat output, making it an ideal choice for commercial stoves, outdoor cooking setups, and industrial heating processes. Constructed from robust cast iron, it features precision-drilled ports that ensure even flame distribution for efficient cooking. Designed for reliability and versatility, this unit is a dependable component for various kitchen appliance models and heavy-duty applications.

Technical Specifications

Design Features

- Circular burner head
- Precision-drilled ports for even flame distribution
- Threaded gas inlet for secure connection

Material	Cast Iron
