

Cast Iron Drainage Grate

This heavy-duty cast iron grate is designed for drainage and industrial applications. The slotted design allows for efficient water runoff while preventing large debris from entering drainage systems.

Product Overview

Heavy-Duty Drainage Solution

This heavy-duty cast iron grate is engineered for demanding drainage and industrial applications. Constructed from durable cast iron, it offers superior load-bearing capacity and robust resistance to corrosion, ensuring longevity in harsh environments. The efficient slotted design facilitates rapid water runoff while effectively preventing large debris from clogging the drainage system.

Technical Specifications

Material	Cast Iron
Design Features	Slotted Design, Heavy-Duty, Corrosion Resistant

Applications

Ideal Use Cases

- Roadways
- Parking Lots
- Industrial Facilities
