

Cast Iron Sump and Effluent Pump

This heavy-duty cast iron pump is designed for reliable and efficient water removal. It is suitable for handling solids and effluent in sump pits, sewage systems, and dewatering applications.

Product Overview

Heavy-Duty Water Management

This cast iron sump and effluent pump is engineered for reliable and efficient water removal in demanding environments. Featuring a robust cast iron construction, it is built for durability and long-term performance in sump pits and sewage systems. The integrated float switch ensures automatic operation, while the thermally protected motor provides safe, consistent performance.

Technical Specifications

Discharge Size	1-1/2 inch NPT
Solids Handling Capacity	0.75 inch

Motor & Electrical

Motor Type	Permanent split capacity motor
Thermal Protection	Yes

Features

Operation Mode Automatic • Float Switch	
Construction	Cast Iron, Heavy-Duty
