

Cast Metal Rake Shovel for Material Handling

This rake shovel is constructed from cast metal. It features a cylindrical handle attached to a flat base with rake-like teeth, designed for scooping, spreading, or leveling materials.

Product Overview

Industrial Material Handling Rake Shovel

This professional-grade rake shovel is engineered for heavy-duty material manipulation in demanding industrial or agricultural environments. Featuring a robust cast metal construction, the tool provides exceptional durability for scooping, spreading, and leveling operations. Its unique design, combining a flat base with integrated rake-like teeth, ensures versatility and efficiency for various site maintenance tasks.

Technical Details

Primary Applications

- Material scooping
- Surface leveling
- Material spreading
- Industrial site maintenance

Construction	Cast metal
Key Features	Heavy-duty, Rake-teeth design, Flat base
