

Casting and Forging Component

This is a high-strength casting and forging component. It is available in multiple sizes and load capacities, suitable for various industrial applications.

Product Overview

High-Strength Industrial Components

These high-strength casting and forging components are engineered for robust performance in demanding industrial environments. Designed to provide reliable structural support, they are available in multiple load capacities and configurations to suit diverse engineering requirements. Each model is precision-manufactured to ensure consistent quality and durability.

Technical Specifications

Dimensional and Load Data

Model	d (mm)	s(mm)	D (mm)	Failure Load (KN)	Weight (kg)
QP-7	17	33.3	50	70	0.27
QP-10	17	33.3	50	100	0.32
QP-16	21	41	60	160	0.5
QP-21	25	49	80	210	0.95
QP-30	25	49	80	300	1.05

Available Models

QP-7, QP-10, QP-16, QP-21, QP-30
