

CAT 5E Shielded Ethernet Outlet Module

This is a CAT 5E shielded outlet module. It is designed for use in networking and telecommunications applications.

Product Overview

High-Performance Network Connectivity

This CAT 5E shielded Ethernet outlet module is engineered to provide reliable and high-speed data transmission for professional networking environments. Designed for robust performance, the shielded construction helps minimize electromagnetic interference, ensuring signal integrity in demanding installations. Its compact and versatile design makes it an ideal solution for various telecommunications and structured cabling requirements.

Technical Specifications

Shielding

Shielded

Category Type

CAT 5E

Product Compatibility

Compatible Module Series

- KF-EBCM (CAT 5E Shielded)
- KF-DM (Telephone Module)
- KF-6CM (Category 6)
- KF-EM (CAT 5E Tool-free)
