

Cat5e UTP Ethernet Cable

This Cat5e UTP cable consists of 4 twisted pairs of unshielded conductors. It is designed for data transmission in networking applications, supporting 10BASE-T, 100BASE-TX, and 1000BASE-T Ethernet.

Overview

Reliable Cat5e Networking Solution

This Unshielded Twisted Pair (UTP) Ethernet cable is engineered to meet enhanced Category 5 standards for consistent data transmission. Featuring four twisted pairs of color-coded solid conductors encased in a protective blue jacket, it provides high-performance connectivity for modern business environments. It is an ideal choice for reliable voice, data, and video transmission across varied local area network setups.

Technical Specifications

Category	Cat5e
Shielding	Unshielded Twisted Pair (UTP)
Conductor Pairs	4

Compatibility

Suitable Applications

- Voice communication
- Data transmission
- Video streaming

Supported Ethernet Protocols	10BASE-T, 100BASE-TX, 1000BASE-T
