Product Overview

High-Performance Network Distribution

This high-density distribution frame is engineered for efficient cable management and organization in professional network installations. It provides a reliable, structured solution for terminating and patching both Cat 5e and Cat 6 cables, ensuring optimal signal integrity and performance. Designed for versatility, it is an ideal choice for data centers, server rooms, and high-bandwidth office environments.

Technical Specifications

| | |
|---------------------|---------------|
| Supported Standards | Cat 5e, Cat 6 |
| Port Capacity | 24 ports |

Features

Key Features

- Independent dustproof design
- Standard cable sequence
- Integrated rear cable management
- Universal cabinet standard compatibility
- Compatible adaptation for easy integration

Ideal Environments

Data Centers • Server Rooms • Office Networks
