

Category 5 UTP Communication Cable

Category 5 unshielded twisted pair (UTP) cable is designed for horizontal cabling in structured cabling systems. It is suitable for data transmission in local area networks (LANs) and other communication applications.

Product Overview

Category 5 UTP Communication Cable

This Category 5 Unshielded Twisted Pair (UTP) cable is engineered for high-performance horizontal cabling within structured cabling systems. It is specifically designed to support reliable data transmission for Local Area Networks (LANs) and a variety of other communication applications. With a robust design, it ensures consistent signal integrity for professional networking environments.

Technical Specifications

Cable Type	Category 5 UTP (Unshielded Twisted Pair)
Configuration	4-Pair
Product Code	TXL150

Packaging & Logistics

Packaging Length	305 m
Packaging Unit	Box

Applications

Primary Applications	LAN Networking, Horizontal Cabling, Structured Cabling, Data Transmission
