

Ceiling and Floor Air Conditioner

The ceiling and floor air conditioner provides a versatile climate control solution for various spaces. It can be installed on either the ceiling or floor, optimizing airflow and offering powerful cooling and heating.

Overview

Versatile Climate Control Solution

This ceiling and floor air conditioner is a flexible climate control solution engineered for both residential and commercial environments. Designed for seamless integration, it offers dual installation options to optimize airflow and space utilization. The unit features advanced filtration, energy-efficient operation, and user-friendly controls to ensure consistent comfort and improved indoor air quality.

Installation & Design

Installation Positions

- Ceiling mounted
- Floor standing

Design Features

Sleek modern design • Digital display • Remote control operation

Performance & Features

Core Functions	Cooling, Heating, Fresh Air Intake
Air Quality	Yes
Energy Efficiency	Energy-efficient design reduces electricity consumption
