

Ceiling Cassette Air Conditioner

This ceiling cassette air conditioner is designed for installation within a suspended ceiling grid. The unit features a square fascia with directional air vents for efficient cooling and heating distribution.

Product Overview

Professional Climate Control

This ceiling cassette air conditioner offers a sophisticated climate control solution designed for seamless integration into suspended ceiling grids. With its streamlined square fascia and multi-directional vents, it ensures optimal airflow distribution for both cooling and heating requirements. The system is engineered to prioritize space efficiency while maintaining high air quality standards through its integrated filtration.

Key Features

Design Features

Ceiling Mounted, Compact Design, Multi-directional Airflow, Integrated Filtration

Application

Ideal Applications

- Commercial offices
- Retail spaces
- Residential living areas
