

Ceiling Fan with Exhaust Function

This ceiling fan is designed to circulate air and exhaust stale air from a room. It features aerodynamically shaped blades for efficient airflow and a central motor housing for quiet operation.

Product Overview

Versatile Airflow Solution

This modern ceiling fan is engineered to provide dual-functionality, serving as both an effective cooling fan and an exhaust system. Its aerodynamic three-blade design ensures efficient air circulation for improved indoor comfort. With a clean, minimalist aesthetic, this unit seamlessly integrates into various interior environments, making it a practical choice for residential or commercial spaces.

Technical Specifications

Number of Blades	3
Design Style	Modern
Color Finish	White

Features

Core Functions	Ceiling Fan, Exhaust Fan
Mounting Style	Ceiling Mount
