

# Ceiling Mounted Evaporator Unit

This ceiling-mounted unit is designed for refrigeration and ventilation purposes. It is suitable for installation in commercial or industrial settings, providing cooling or air circulation.

## Product Overview

### Industrial Ceiling-Mounted Evaporator

This ceiling-mounted evaporator unit is engineered for efficient climate control in commercial and industrial refrigeration or ventilation environments. Its robust, rectangular design ensures seamless integration into ceiling spaces while providing optimized air circulation. Ideal for demanding settings, this unit delivers reliable cooling performance and consistent airflow to maintain precise environmental conditions.

## Design and Installation

Mounting Type	Ceiling Mounted
Form Factor	Rectangular
Key Features	White Grille, Diffuser Face, Industrial Grade
