

Cement Scale for Construction

The Cement Scale is designed for accurately weighing cement and coal ash in construction environments. It features high weighing accuracy and simple operation, making it suitable for various construction sites.

Product Overview

Precision Cement Scale

This cement scale is engineered for the precise measurement of cement and coal ash in demanding construction environments. Designed with high weighing accuracy and a focus on simple, intuitive operation, it ensures reliable performance on various job sites. Its robust construction makes it an essential tool for maintaining quality control in construction material handling.

Technical Specifications

Maximum Weighing Capacity	300 kg
Weighing Accuracy	±1%
Overall Dimensions	1410mm x 880mm x 1500mm
Total Weight	260 kg

Application & Features

Operational Features

- High weighing accuracy
- Simple operation
- Suitable for construction sites

Suitable Materials	Cement, Coal Ash
