

Centrifugal Juicer with Pulp and Juice Containers

This household kitchen appliance is designed for juicing fruits and vegetables using a centrifugal extraction system. It includes separate transparent containers for pulp and juice collection, ensuring efficient and safe operation.

Product Overview

Efficient Centrifugal Juicing

This centrifugal juicer is designed for high-performance extraction in compact kitchen environments. Featuring a wide feeding chute, it accommodates whole fruits with ease, streamlining the preparation process. The unit is built with food-grade materials and includes dedicated containers for both juice and pulp, ensuring efficient operation and easy cleanup.
