

Centrifugal Pump for Fluid Transfer

This centrifugal pump is designed for efficient fluid transfer. It is suitable for use in water treatment, chemical processing, and HVAC systems.

Product Overview

Industrial Fluid Control Solution

This industrial butterfly valve is engineered for precise flow control within pipeline systems. Featuring a durable rotating circular disc design, it effectively regulates or obstructs fluid passage in demanding environments. It is an ideal solution for critical infrastructure applications, including water treatment facilities, chemical processing plants, and HVAC systems.

Technical Specifications

Key Design Features

- Rotating circular disc mechanism
- Durable construction for long service life
- Versatile pipeline integration
- Reliable flow regulation

Customization Options

Various Sizes Available • Multiple Material Options

Suitable Applications

Water Treatment, Chemical Processing, HVAC Systems, Pipeline Flow Control
