

Centrifugal Water Pump

The PM Series centrifugal water pump is a robust and efficient solution for various water transfer applications. Engineered for reliable performance, this pump features a durable construction designed to withstand demanding operating conditions.

Overview

PM Series Centrifugal Pump

The PM Series centrifugal water pump is a robust and efficient solution engineered for reliable performance in various water transfer applications. Its compact design ensures easy installation in confined spaces, while the high-efficiency motor and corrosion-resistant components provide long-term durability. This pump is ideal for residential and light commercial use, offering a dependable solution for irrigation, water circulation, and pressure boosting systems.

Technical Specifications

Key Design Features

- High-efficiency motor
- Corrosion-resistant construction
- Compact footprint
- Simplified maintenance design

Pump Type	Centrifugal
Suitable Applications	Residential Water Supply, Gardening, Irrigation, Water Circulation, Pressure Boosting Systems
