

Centrifugal Water Pump

This centrifugal pump is designed for various water pumping applications. It features a cast iron pump body and impeller for durability and resistance to corrosion.

Overview

Professional Centrifugal Water Pump

This centrifugal water pump is a robust solution designed for diverse fluid transfer requirements in both residential and commercial environments. Featuring a durable cast iron construction for both the body and impeller, the unit offers excellent corrosion resistance and operational longevity. Engineered for continuous performance, it provides stable flow rates and reliable pressure for clean water transfer, irrigation, and boosting applications.

Technical Specifications

Operational Features

- Continuous operation capability
- High-efficiency electric motor
- Stable flow rate
- Reliable pressure maintenance

Construction Materials

Cast Iron Pump Body, Cast Iron Impeller

Applications

Suitable Applications

Clean water transfer • Irrigation • Pressure boosting • Residential use • Commercial use
