

Centrifugal Water Pump for Industrial Applications

This close-coupled centrifugal pump is designed for industrial and commercial applications. It features a durable pump housing and efficient impeller for optimal water flow, suitable for various systems.

Product Overview

Industrial Centrifugal Water Pump

This close-coupled centrifugal pump is engineered for versatile water supply and circulation tasks across civil, industrial, and domestic environments. Designed for reliability, it features a robust motor and efficient impeller construction suitable for wells, reservoirs, and irrigation systems. The unit is optimized for ease of installation and maintenance, ensuring consistent liquid transfer and pressure boosting performance.

Operating Conditions

Maximum Fluid Temperature	40 °C
Maximum Sand Content	0.25 %

Electrical Specifications

Supported Voltages

- Three-phase: 380V-415V/50Hz
- Single-phase: 220V-240V/50Hz

Motor Type	Rewindable motor
------------	------------------

General Information

Warranty	1 year
----------	--------

Applications

Suitable Applications	Water Supply, Domestic Use, Civil Applications, Industrial Applications, Garden Use, Irrigation
-----------------------	---
