

Centrifugal Water Pump for Irrigation and Drainage

This centrifugal water pump is designed for drainage and irrigation. Its robust construction features a cast iron body and efficient motor cooling.

Product Overview

High-Efficiency Centrifugal Pump

This robust centrifugal water pump is engineered for reliable performance in both agricultural irrigation and industrial drainage systems. Built with a durable cast iron body, the unit is designed to withstand demanding environments while maintaining stable operation. Its specialized motor housing features integrated cooling fins to ensure optimal thermal management during extended periods of heavy use.

Technical Specifications

Body Material	Cast Iron
Typical Applications	Agricultural Irrigation, Industrial Drainage

Design Features

Installation

- Multiple inlet/outlet ports
- Sturdy mounting base

Cooling Mechanism	Finned motor housing for heat dissipation
