

Centrifugal Water Pump with 4"x3" Ports

This centrifugal pump is engineered with 4"x3" ports. It is available in 15HP, 20HP, 25HP, and 30HP configurations for diverse flow and pressure needs.

Overview

Professional Centrifugal Water Pump

The MF80 series centrifugal pump is a robust solution engineered for reliable industrial and commercial fluid transfer. Featuring a 4"x3" port configuration, this unit provides consistent performance for water circulation and pressure boosting applications. Its durable construction ensures a long service life, making it a dependable choice for demanding fluid handling environments.

Performance Specifications

Available Power Ratings

- 15HP
- 20HP
- 25HP
- 30HP

Port Configuration	4 inch x 3 inch
