

Ceramic Electric Herbal Kettle

This electric kettle features a ceramic body, perfect for boiling water or herbal teas. It utilizes a divided heating structure to prevent contact between the herbs and metal, ensuring purity.

Product Overview

Traditional Craftsmanship Meets Modern Utility

This ceramic electric herbal kettle combines traditional aesthetics with modern convenience. Crafted from high-quality purple clay, it ensures a 100% pollution-free boiling process without any chemical composition. The innovative divided heating structure prevents direct contact between herbs and metal components, preserving the purity and health benefits of your herbal infusions.
