

Ceramic Lamp Holder G22

The G22 lamp holder is a robust component for secure and efficient electrical connection of lamps. Constructed from durable ceramic, it provides excellent heat resistance and electrical insulation.

Overview

Robust Ceramic G22 Lamp Holder

The G22 lamp holder is a robust and reliable component designed for the secure and efficient electrical connection of lamps. Constructed from durable ceramic, it provides excellent heat resistance and superior electrical insulation. Its compact design allows for versatile integration into various industrial and commercial lighting fixtures, ensuring a stable and long-lasting connection.

Technical Specifications

Base Type	G22
Material	Ceramic
Connection Method	Screw Terminal

Key Features

Key Features	Heat Resistant, Electrical Insulation, Compact Design, Secure Wiring
--------------	----------------------------------------------------------------------

Applications

Recommended Use

- Industrial Lighting
- Commercial Lighting
- General Lighting Fixtures
