Product Overview

Professional Ceramic Tile Abrasive Solutions

These high-performance abrasive tools are engineered for the rigorous demands of ceramic tile manufacturing, including polishing and sizing operations. Designed for use on continuous production lines, they deliver consistent results across various tile types such as polished porcelain, glazed, and rustic tiles. With a focus on operational efficiency, these tools provide excellent sharpness, high gloss levels, and a non-staining finish, ensuring superior surface quality and dimensional accuracy.

Application & Compatibility

Compatible Tile Types	Polished Porcelain, Glazed Tiles, Rustic Tiles, Wall Tiles
Machine Compatibility	Continuous polishing and sizing machines

Tool Types

Available Abrasive Types

- Glazed polishing abrasive
- Diamond fickert
- Magnesia abrasive
- Squaring wheels (Wet & Dry)

Performance Metrics

Key Performance Indicators

100 %

Non-staining Capability

1 None

Surface Scratching

Operational Benefits

Excellent Sharpness • High Glossiness • Long Working Life • High Working Efficiency • Stable Quality
