

# Chemical Resistant Safety Gloves

These chemical resistant gloves provide superior hand protection in hazardous environments. Constructed from durable and flexible material, they offer excellent resistance to a wide range of chemicals, acids, and solvents.

## ADDITIONAL IMAGES

## Product Overview

### Professional Chemical Protection

These heavy-duty chemical resistant gloves are designed for superior hand protection in demanding industrial environments. Constructed with a 100% red PVC vulcanized coating on a durable polyester/cotton support, they offer excellent abrasion resistance and a waterproof barrier. The design ensures both safety against micro-organisms and splashes of low-concentration chemical products, making them ideal for laboratory, industrial cleaning, and chemical processing applications.

## Physical Properties

Material Composition	100% PVC, Polyester, Cotton
Glove Length	35 cm
Coating	Fully coated

## Performance & Safety

### Protection Capabilities

Chemical Resistant • Abrasion Resistant • Waterproof • Airtight • Micro-organism Protection

### Compliance Standards

- EN388:2003 (Mechanical Risks)
- EN420:2003 (General Requirements)

## Usage & Maintenance

Maintenance	No specific cleaning or maintenance required.
Storage	Store in original packaging in a dark, dry place.
