

Chiffon Top Embroidery Machine

This machine is designed for adding embroidery to chiffon tops. It creates intricate designs on lightweight, semi-sheer fabrics, including details like smocked bodices and shoulder straps.

Product Overview

Elegant Embroidery Capability

This specialized embroidery machine is designed to handle delicate fabrics like chiffon with precision and care. It features advanced stitching controls to ensure intricate embroidery details are applied without damaging lightweight, semi-sheer materials. Ideal for garment manufacturers focusing on high-quality, warm-weather apparel with detailed necklines and hemline embellishments.

Technical Features
