

Child Bicycle Tow Bar Attachment

This bicycle trailer attachment enables connection of a child's bicycle to an adult bicycle for tandem riding. It allows the adult rider to control steering and braking for both bicycles, and the child's bicycle can be quickly detached when desired.

Product Overview

Tandem Cycling Solution

The Child Bicycle Tow Bar Attachment facilitates a safe and seamless connection between an adult bicycle and a child's bicycle. This system allows for tandem riding, giving the adult rider full control over steering and braking while the child builds confidence on the road. Designed for efficiency, the attachment can be quickly mounted for long rides and detached with ease once the child is ready to ride independently.
